

## Efficient Energy Use

Using utilities when they're not needed can be costly. Here are some tips to follow to save money.

- When you leave your home, you can save money by:
  - Turning off all lights
  - Turning down the heat / turning off air conditioning
  - Unplug electronics not in use
- LED bulbs use much less electricity than incandescent bulbs
- Don't leave water running while you brush your teeth
- Check that outdoor hoses are turned off and not leaking
- You can contact PG&E to conduct a free home energy audit to inspect your house for anything not energy-efficient that may be costing you extra money
- Turn down the heat at night
